PROFESSIONAL SUMMARY

Experienced data analyst with strong mastery of Microsoft Excel, SQL, and Power BI for developing and maintaining data reports, dashboards, and actionable insights that support leadership decision-making. Excel at analysing operational and engagement-style datasets, maintaining data quality, governance standards, and consistency across systems, while identifying trends and opportunities for process improvement. Proven ability to translate complex data into clear visual presentations and support cross-functional teams with best-practice data management and reporting in regulated environments. Eager to apply these skills to maintain Synergetic SIS and Schoolbox LMS workflows and deliver insights that drive student learning outcomes.

SKILLS

- Advanced Microsoft Excel (PivotTables, complex formulas, data validation)
- Power BI and Tableau (dashboard development, reporting, and visualisation)
- SQL – data extraction, querying, aggregation, validation, and analysis
- Data cleaning, validation, reconciliation, error checking, and governance in regulated environments
- Maintaining data quality, consistency, and documentation across multiple systems
- Analysing datasets to identify trends, patterns, and actionable recommendations for decision-making
- Translating complex data insights for non-technical stakeholders and leadership teams
- Collaborating with cross-functional teams and supporting best-practice data entry and system use
- Process improvement, workflow optimisation, and automation through reporting and analytics
- Strong written & verbal communication and stakeholder engagement skills

CERTIFICATIONS

Professional Data Science Certificate Programme (In progress)

ALX (In Collaboration with Google, AWS, Meta, Mastercard)

Excel Skills for Data Analytics and Visualisation

Macquarie University, Sydney, Australia

Microsoft Excel: Advanced Formulas and Functions

Maven Analytics, Chris Dutton

Google Data Analytics Professional Training

Google

PROFESSIONAL DATA SCIENCE CERTIFICATE

Sept 2025 – Dec 2026 ALX (in partnership with Google, AWS, Meta, Mastercard Foundation)

- Advanced Python programming for data science (data structures, algorithms) •
Machine Learning fundamentals (supervised/unsupervised learning, scikit-learn)
- Statistics & probability for data analysis (distributions, hypothesis testing, regression)
- Data engineering basics (ETL pipelines, cloud tools, Git workflows)
- Building end-to-end ML projects with real-world datasets

DATA ANALYTICS PROJECTS

Hospital Patient Analytics & Compliance Reporting (Advanced Excel + SQL + Tableau)

- Managed and cleaned large clinical datasets (1,478 patient records across 35 doctors/specialties) using advanced Excel (Power Query, VLOOKUP, PivotTables) and SQL to ensure 100% data accuracy and integrity before reporting.

FAITH EDACHE
+61 411918386
faithedache23@gmail.com
[linkedin.com/in/faithedache](https://www.linkedin.com/in/faithedache)

- Performed thorough data validation, error checking, and reconciliation to produce reliable operational reports on patient-to-doctor Ratio, Average Length of Stay, and Top Illness Categories.

Clinical Outcomes & Governance Dashboard (Advanced Excel + SQL + Tableau)

- Analysed and integrated sensitive oncology datasets (135 cancer vs 90 non-cancer records) from multiple sources to build and maintain dashboards that identified mortality trends, age distribution, length of care, and professional-to-patient ratios for leadership and clinical teams.
- Ensured data consistency, privacy, and governance through rigorous validation and reconciliation, producing clear visual presentations and actionable reports to support regulatory requirements and evidence-based decision-making.
- Collaborated with healthcare teams to translate complex data into understandable insights and optimise reporting processes.

PROFESSIONAL EXPERIENCE

Research Internship – Clinical Data Integrity

Hope Research Team, University of Ilorin, Nigeria

- Collected, cleaned, validated, and reconciled experimental healthcare data with 100% accuracy and integrity, ensuring publication-grade compliance and reliability.
- Produced detailed performance and summary reports using Excel for senior researchers and a peer-reviewed publication.

EDUCATION

BSc (Hons) Physiology

2015 – 2021

University of Ilorin, Nigeria
